Profile

Blue Team Defender | Senior Cybersecurity Student

SOC Analyst Diploma Graduate (Telecom Egypt – WE) • Cisco Cybersecurity Engineer (DEPI)

Passionate threat detection, incident response & network defense specialist

Eager to thrive and grow in a fast-paced environment.

Education

Primary, Secondary, and senior secondary education

Al Sayeda Aisha Language School

2022/09 – 2026

Bachelor of science in Computer Science

menofia university

Skills

Security Tools

- Scan networks and enumerate services to identify open ports and vulnerabilities
- Captured and analyzed network packets

Programming

Python, C++

Operating Systems

Linux (Kali) , Windows Server (client/server)

Networking

TCP/IP, Firewalls, VPNs, IDS/IPS

Certificates

- Infrastructure and Security - Cisco Cyber Security Engineer [🔗](#)

- Cyber Security Diploma Blue Team [🔗](#)

Courses

2025/08 – 2025/12

Cyber Security Diploma Blue Team

WE Training & Development Sector

- CCNA
- Network Security & Firewall
- Linux
- MCSA
- Python for Security Automation
- Ethical Hacking Fundamentals
- SOC (Security Operation Center)
- SIEM solution (Operation and Implementation)
- DFIR (Digital Forensics and Incident Response)
- Threat Intelligence & Threat Hunting
- Brand Protection & Dark Web Monitoring

2024/11 – 2025/05

Infrastructure and Security - Cisco Cyber Security Engineer [🔗](#)

Digital Egypt Pioneers Initiative (DEPI) by the Ministry of Communications and Information Technology

- Cisco CCNA
- Cisco CyberOps Associate

Training

Networking and Cybersecurity at BARQ Systems [↗](#)

Round 14 (48 Hours)

ArchonSecurity SOC Analyst internship [↗](#)

- Gained hands-on skills in malware types, log analysis (Sysmon, Event Viewer), suspicious behavior detection, phishing analysis (Gmail/Outlook), and MITRE ATT&CK / Cyber Kill Chain frameworks.
- Applied incident response and advanced investigation techniques: file analysis, dynamic malware analysis, and network forensics.
- Developed proficiency in SIEM for log monitoring, correlation, threat hunting, plus vulnerability scanning and threat intelligence basics.
- Explored emerging AI security: shadow AI detection, data leakage prevention, prompt injection, supply chain, and model attacks.
- Strengthened practical abilities through multiple hands-on tasks, real-world scenarios, attack investigations, and career-prep discussions.
- AI-based threat detection and LLM-specific vulnerabilities
